

Contouring Comfort Strap Backs (E2611 & E2612)

Front view of Strap Back (with cover)

Rear view of Strap Back (with cover open)

The Healthwares Contouring Comfort Strap Back is a flexible contour backrest for wheelchairs incorporating a series of adjustable straps with a zippered padded cover. The adjustable back straps allow contouring for accommodation of fixed or flexible spines/backs, greater trunk stability, active extension of the lumbar, improved head control by stacking the spine in an anatomically correct position, and more room for end users with redundant tissue. Customize the cover padding with thicker foam, gel packs, or air cells for maximizing user comfort and pressure relief. Cover also features a center line stitch allowing for easier folding.

The Strap Back is lightweight and foldable—similar to conventional sling backrests—while offering the advantages of positioning adjustability, uniform pressure distribution, and improved user comfort. Made of high quality fabrics for wear resistance and long life.
